

Vacheron Constantin - Year of the Monkey

by Redazione | beWatch | November 11th, 2015

Vacheron Constantin is pursuing its dialogue with collectors and passionate devotees of Haute Horlogerie by enriching its **Métiers d'Art La légende du zodiaque chinois** series with the sign of the monkey. The latter will take over from that of the goat at the Chinese New Year on February 8th 2016. Bearing the Hallmark of Geneva, these two new creations, realised in twelve models each, combine the technical excellence of Caliber 2460 G4 with the beauty of artistic crafts.

The **foliage motif** appearing on the dial and based on classic **Chinese iconography** is etched directly in the metal. The pattern remains semi-embedded and stands out from its gold base by a subtle stage-setting of variously accentuating reliefs creating a depth effect. This makes the vegetation appear to be floating over the dial.
